Ui|Path

Palmbots offers customized bots that do the manual and repetitive tasks through latest technology solutions like machine learning and artificial intelligence. Users can manage and run these bots that are efficient and specialized for the tasks while saving time and increasing compliance for the company.

PalmBot bots do repetitive and time incentive work, like logging into applications and systems, moving files and folders, extracting, copying, and inserting data, filling in forms, and completing periodic analyses and reports. The automation also supports tasks for understanding unstructured data, and applying advanced machine learning models to make complex decisions.
